## 1 Description

The EC 1 12DC... electronic circuit breakers selectively protect 12 V DC load circuits in hazardous and nonhazardous environments. A combination of an active electronic current limit for short circuits and an overload shutdown ensures that the EC 1 12DC... will quickly react to an over-current condition in the protected circuit.
Current limitation restricts fault current to 1.5-1.8 times the nominal current rating $\left(I_{N}\right)$. As a result, the EC 1 12DC... can prevent the loss of the DC output voltage sometimes experienced when a faulted circuit triggers a switched-mode power supply into self-protected output-shutdown mode. Capacitive loads of up to $75,000 \mu \mathrm{~F}$ can be protected.
The EC 1 12DC... electronic circuit breakers are available with nominal current ratings from 1 to 10 A . Local status indication is provided by a multi-color LED, and remote status indication is available via status output ( $+12 \mathrm{~V}=\mathrm{OK}$ ). Manual on/off and reset is accomplished using the integrated slide switch. Remote reset (EC 1 12DC... S-R) and remote on/off (EC 1 12DC... S-C) versions are available.
The EC 1 12DC... can be snapped onto 35 mm mounting rails (EN 50022) for fast and easy installation. At just 12.5 mm wide, it requires only a small space on the rail.

Screw connection technology provides secure and reliable wire connection.
The integrated current distribution system is another advantage of the EC 1 12DC... circuit breakers. Wiring can be implemented easily using available busbar.

## 2 Features

- Selective load protection
- Current limitation on overload/short circuits
- Protection for capacitive circuits up to $75,000 \mu \mathrm{~F}$
- Current ratings from 1 to 10 A
- Manual on/off/reset slide switch
- Electronic reset option
- Electronic on/off option
- $\quad 12.5 \mathrm{~mm}$ width for minimal rail footprint
- Bridging available for line (+) and return (-)
- Remote status indication (+12 V = OK)
- Multi-color status LEDs

Make sure you always use the latest documentation. It can be downloaded at phoenixcontact.com.

This data sheet is valid for all products listed on the following page:

## 3 Ordering data

## Products

| Description | Type | Order No. | Pcs. / Pkt. |
| :---: | :---: | :---: | :---: |
| Electronic circuit breaker, 1 A, 12 V DC, on/off control input and status output | EC 1 12DC/1A S-C | 3000754 | 1 |
| Electronic circuit breaker, $2 \mathrm{~A}, 12 \mathrm{~V}$ DC, on/off control input and status output | EC 1 12DC/2A S-C | 3000755 | 1 |
| Electronic circuit breaker, $3 \mathrm{~A}, 12 \mathrm{~V}$ DC, on/off control input and status output | EC 1 12DC/3A S-C | 3000756 | 1 |
| Electronic circuit breaker, $4 \mathrm{~A}, 12 \mathrm{VDC}$, on/off control input and status output | EC 1 12DC/4A S-C | 3000757 | 1 |
| Electronic circuit breaker, $6 \mathrm{~A}, 12 \mathrm{~V}$ DC, on/off control input and status output | EC 1 12DC/6A S-C | 3000758 | 1 |
| Electronic circuit breaker, $10 \mathrm{~A}, 12 \mathrm{~V}$ DC, on/off control input and status output | EC 1 12DC/10A S-C | 3000759 | 1 |
| Electronic circuit breaker, $1 \mathrm{~A}, 12 \mathrm{~V} \mathrm{DC}$, reset input and status output | EC 1 12DC/1A S-R | 3000760 | 1 |
| Electronic circuit breaker, $2 \mathrm{~A}, 12 \mathrm{~V}$ DC, reset input and status output | EC 1 12DC/2A S-R | 3000761 | 1 |
| Electronic circuit breaker, $3 \mathrm{~A}, 12 \mathrm{~V}$ DC, reset input and status output | EC 1 12DC/3A S-R | 3000762 | 1 |
| Electronic circuit breaker, $4 \mathrm{~A}, 12 \mathrm{VDC}$, reset input and status output | EC 1 12DC/4A S-R | 3000763 | 1 |
| Electronic circuit breaker, $6 \mathrm{~A}, 12 \mathrm{VDC}$, reset input and status output | EC 1 12DC/6A S-R | 3000765 | 1 |
| Electronic circuit breaker, $10 \mathrm{~A}, 12 \mathrm{~V}$ DC, reset input and status output | EC 1 12DC/10A S-R | 3000766 | 1 |

## 4 Technical data

## i <br> Data values at $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}, \mathrm{U}_{\mathrm{S}}=12 \mathrm{~V} \mathrm{DC}$

## Operating data

| Nominal voltage $U_{S}$ | 12 V DC |
| :--- | :--- |
| Voltage range | $9 \ldots 18 \mathrm{~V} \mathrm{DC}$ |
| Nominal current $\mathrm{I}_{\mathrm{N}}$ | See "Current rating" on page 3 |
| Closed-circuit current $\mathrm{I}_{0}$ | When on: $15 \ldots 20 \mathrm{~mA}$ typical |
| Shutdown time, typical | 3 s at $\mathrm{I}_{\text {Load }}>1.1 \times \mathrm{I}_{\mathrm{N}}$ |
|  | $50 \mathrm{~ms} \ldots 3 \mathrm{~s}$ at $\mathrm{I}_{\text {Load }}>1.8 \mathrm{I}_{\mathrm{N}}\left(\right.$ or $\left.1.5 \times \mathrm{I}_{\mathrm{N}}\right)$ |

| Load circuit |  |
| :--- | :--- |
| Load output | Power MOSFET switching output (positive switching) |
| Overload shutdown | Typically $1.1 \times \mathrm{I}_{\mathrm{N}}\left(1.05 \ldots 1.35 \times \mathrm{I}_{\mathrm{N}}\right)$ |

| Connection data |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Line+/Load+/0 V |  |  |  |  |  |  |
| Thread size | M4 |  |  |  |  |  |
| Conductor size |  |  |  |  |  |  |
| 1 solid or stranded conductor | $0.5 \ldots 10 \mathrm{~mm}^{2}$ with or without ferrule |  |  |  |  |  |
| 2 solid or stranded conductors with same cross-section | $0.5 \ldots 4 \mathrm{~mm}^{2}$ without ferrule; $0.5 \ldots 2.5 \mathrm{~mm}^{2}$ with ferrule |  |  |  |  |  |
| 2 stranded conductors with TWIN ferrule | $0.5 \ldots 6 \mathrm{~mm}^{2}$ |  |  |  |  |  |
| Stripping length | 10 mm |  |  |  |  |  |
| Tightening torque | $1.5 \ldots 1.8 \mathrm{Nm}$ |  |  |  |  |  |
| Signal connections |  |  |  |  |  |  |
| Thread size | M3 |  |  |  |  |  |
| Stranded conductor size with ferrule | $0.25 \ldots 2.5 \mathrm{~mm}^{2}$ |  |  |  |  |  |
| Stripping length | 8 mm |  |  |  |  |  |
| Tightening torque | $0.5 \ldots 0.6 \mathrm{Nm}$ |  |  |  |  |  |
|  |  |  |  |  |  |  |
| General data |  |  |  |  |  |  |
| Mounting | DIN rail in acc. with EN 50072 (NS $35 \times 7.5$ ) |  |  |  |  |  |
| Degree of protection | IP20 |  |  |  |  |  |
| Temperature range, operation |  |  |  |  |  |  |
| Ordinary location | $-20 \ldots 60^{\circ} \mathrm{C}$ |  |  |  |  |  |
| Hazardous location (Class I, Div. 2) | $0 \ldots 25^{\circ} \mathrm{C}$ |  |  |  |  |  |
| Temperature range, storage | $-20 \ldots 70^{\circ} \mathrm{C}$ |  |  |  |  |  |
| Weight | 65 g |  |  |  |  |  |
| Status and control |  |  |  |  |  |  |
| Status LED | Green: power applied <br> Orange: overload or short circuit leading to electronic shutdown condition Red: electronically disconnected; low voltage ( $<3.25 \mathrm{~V}$ ); load circuit/powerMOSFET off <br> Off: under voltage or no power; manually switched off |  |  |  |  |  |
| Terminals |  |  |  |  |  |  |
| Gnd (-) | Pin 3 |  |  |  |  |  |
| NC signal contacts | - |  |  |  |  |  |
| NO signal contacts | - |  |  |  |  |  |
| Remote control/reset | Pin 21/22 |  |  |  |  |  |
| Status output | Pin 23 |  |  |  |  |  |
| Switching capacity $\mathrm{I}_{\mathrm{CN}}$ | Active current limitation |  |  |  |  |  |
| Expected life with $1 \times \mathrm{I}_{\mathrm{N}}$ | 10000 cycles |  |  |  |  |  |
|  |  |  |  |  |  |  |
| Current rating |  |  |  |  |  |  |
| Current rating, $\mathrm{I}_{\mathrm{N}}(\mathrm{A})$ | 1 | 2 | 3 | 4 | 6 | 10 |
| Voltage drop, typical, at $\mathrm{I}_{\mathrm{N}}(\mathrm{mV})$ | 80 | 130 | 80 | 100 | 130 | 150 |
| Active current limitation, typical | $1.8 \times{ }^{\text {N }}$ | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | $1.8 \times{ }^{\text {N }}$ | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | $1.5 \times \mathrm{I}_{\mathrm{N}}$ |
| Maximum load current at $40^{\circ} \mathrm{C}$ at $100 \%$ duty cycle (A) | 1 | 2 | 3 | 4 | 6 | 10 |
| Maximum load current at $50^{\circ} \mathrm{C}$ at $100 \%$ duty cycle (A) | 1 | 2 | 3 | 4 | 5 | 9 |
| Approval/conformance |  |  |  |  |  |  |
| Vibration | 3 g tested in acc. with IEC 60068-2-6, test Fc |  |  |  |  |  |
| Conformance with EMC Directive 2004/108/EC | Noise emission: EN 61000-6-3 |  |  |  |  |  |
| Insulation coordination (IEC 60934) | $0.5 \mathrm{kV} / 2$ pollution degree 2, increased insulation in actuation area |  |  |  |  |  |

| Approval/conformance |  |
| :--- | :--- |
| Dielectric strength | 18 VDC maximum (load circuit) |
| Insulation resistance (off state) | None (electronic shutdown only) |
| Approvals | C $\epsilon$ |
|  | 90 Solid state overcurrent protector (UL 2367) |
|  | TU Class I, Division 2, Groups A,B,C,D T5 (UL 1604) |

## Voltage drop, current limitation, maximum load current

| Nominal current $\mathrm{I}_{\mathrm{N}}$ | Voltage drop $\mathrm{U}_{\mathrm{ON}}$ at $\mathrm{I}_{\mathrm{N}}$ (typical) | Active current limitation (typical) | Maximum load current at 100\% on duty |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | $\mathrm{T}_{\mathrm{A}}=40^{\circ} \mathrm{C}$ | $\mathrm{T}_{\mathrm{A}}=50^{\circ} \mathrm{C}$ |
| 1A | 80 mV | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | 1 A | 1 A |
| 2 A | 130 mV | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | 2 A | 2 A |
| 3 A | 80 mV | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | 3 A | 3 A |
| 4 A | 100 mV | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | 4 A | 4 A |
| 6 A | 130 mV | $1.8 \times \mathrm{I}_{\mathrm{N}}$ | 6 A | 5 A |
| 10 A | 150 mV | $1.5 \times \mathrm{I}_{\mathrm{N}}$ | 10 A | 9 A |

## $\bullet$ When mounted side-by-side without airflow between the electronic circuit breakers, current load should be reduced to $80 \%$ of rated load when operating at a $100 \%$ duty cycle.

## 5 Operating characteristics

### 5.1 Information required for UL approval

## WARNING:

Exposure to some chemicals may degrade the sealing properties of materials used in EC 1 12DC.... These products use the following materials:
Sealing material:

- Generic name: Modified diglycidyl ether of bisphenol A
- Supplier: Fine Polymers Corporation
- Type: Epi Fine 4616L-160PK

Casing material:

- Generic name: Liquid crystal polymer
- Supplier: Sumitomo Chemical
- Type: E4008, E4009 or E6008

Periodically inspect the EC 1 12DC... for any degradation of properties and replace if degradation is found.

## WARNING: Explosion hazard

Do not disconnect equipment unless power has been removed or the area is known to be nonhazardous.
Substitution of any components may impair suitability for hazardous locations.

Figure 3 UL-approved package slip

## 

## Electronic Circuit Protector

 EC-E, EC-E1, EC-E4, EC1
## 

This device is suitable for use in Class I, Div 2, Groups A, B, C, D;
TC T5; UL File\# E324415
Warnings:

1. Remove power before disconnecting device.
2. Components substitutions may impair suitability of Class I, Div 2
3. Chemical exposure may degrade internal relay's sealing property in the EC-E1 and EC-E4 products only.

## TS

Non-hazardous use - UL File\# E317172
Refer to data sheet / installation guidelines for installation and safety instructions.

### 5.2 Time/current characteristics

The trip time is typically 3 s in the range between 1.1 and $1.8 \mathrm{xI}_{\mathrm{N}}{ }^{1}$.
Electronic current limitation typically occurs at $1.8 \times I_{N}$ which means that, under all overload conditions (independent of the power supply and the resistance of the load circuit), the maximum overload before disconnection will not exceed $1.8 \times I_{N}$ times the current rating. Trip time is between 100 ms and 3 s (depending on overload or at short circuit).
Without this current limitation, a considerably higher overload current would flow in the event of an overload or short circuit.

Figure 4 Time/current characteristic curve

[^0]
## 6 Installation

The EC 1 12DC... features an integrated power distribution system.

Insert bridges and protection slides to be flush with housing sides.

$12.5 \times \mathrm{n}=$ width of protector block e.g., $12.5 \times 5=62.5 \mathrm{~mm}$

$1 \mathrm{I}_{\mathrm{MAX}}=50 \mathrm{~A}$ when connected with a single input wire to the center of the bar $\mathrm{I}_{\mathrm{MAX}}=63$ A when connected with two input wires, one at each end of the bar

Figure 5 Mounting options and components

## NOTE:

A 0 V connection is required for the EC $112 \mathrm{DC} . .$.
A maximum of 10 insertion/removal cycles are allowed for busbars.
When mounted side-by-side without airflow between the electronic circuit breakers, current load should be reduced to $80 \%$ of rated load when operating at a $100 \%$ duty cycle.
Busbars should be interrupted and re-connected every 10 devices.

## 1

## WARNING:

Ensure that all personnel are clear before applying a reset to multiple circuit breakers. While breakers that are on will be unaffected, any breakers that were electronically tripped due to an overload condition will be turned on.

When the breaker is on, 12 V DC is available at the Status Output (terminal 23) (see Figure 2 for terminal locations).

Figure 6 EC 1 12DC... S-R signal inputs/outputs
EC 1 12DC... S-R breakers with remote reset option may be remotely reset by the trailing edge of a +12 V DC pulse applied to the Reset Input (terminal 22).

Figure 7 EC 1 12DC... S-C signal inputs/outputs
EC 1 12DC... S-C breakers with remote control option may be turned on/off by cycling the +12 V DC applied to terminal 21.

[^0]:    1 Current limitation is typically $1.8 \times \mathrm{I}_{\mathrm{N}}$ times rated current at $I_{N}=0.5 \mathrm{~A}$ to 6 A
    Current limitation is typically $1.5 \mathrm{xI}_{\mathrm{N}}$ times rated current at $\mathrm{I}_{\mathrm{N}}=8 \mathrm{~A}$ or 10 A
